Experiences and Skills
<p>Please write your experiences and skills after your graduation from (or dropping out of) high school until now.            *You can write about any field besides IT. Please write the details of your experiences through work, or of lessons or self-study for improving your skills.            Please also attach the document of proof if you have.</p>
<p><b>In 2017 to 2018 I attended Landmark College where I sharpened my writing skills as well as my time management in order to fulfill all my required tasks in the allotted time. Furthermore, I strengthened the way I presented new ideas and in a structured way.</b></p> <p><b>What I experienced during this time at the college was very constructive. In very pragmatic way, I had the opportunity to study with different people around the United States but also with people around the globe. This multicultural experiences were and are still beneficial for me especially in two main points :</b></p> <p><b>The first one is that I am even more curious about the cultural differences in are world today. I have now a lot more interest in the world we are living in and more aware of the problems in which we live in.</b></p> <p><b>The second point is I find that the people I meet are more interesting and more open to debate or/and to discussion.</b></p> <p><b>During my volunteer civic work at the hospital Pitié Salpêtrière I worked with patients, some of which where deaf. To help those patients I learned the basic of the French sign language. Being the biggest hospital in Europe, I had patients from around the world and so had to improve my Spanish (I also speak French and English). Working in a large hospital can be challenging and there is little room for error, I needed to help the patients of the hospital as best as I could and manage my time very carefully.</b></p>
